Subresource Integrity

If you are loading Highlight.js via CDN you may wish to use [Subresource Integrity](#) to guarantee that you are using a legitimate build of the library.

To do this you simply need to add the `integrity` attribute for each JavaScript file you download via CDN. These digests are used by the browser to confirm the files downloaded have not been modified.

```
<script
    src="//cdnjs.cloudflare.com/ajax/libs/highlight.js/11.11.1/highlight.min.js"
    integrity="sha384-5xdYoZ0Lt6Jw8GFfRP91J0jaOVUq7DGI1J5wIyNiOD+eHVdfUwHR4gW6kPsw489E"></script>
<!-- including any other grammars you might need to load -->
<script
    src="//cdnjs.cloudflare.com/ajax/libs/highlight.js/11.11.1/languages/go.min.js"
    integrity="sha384-HdearVH8cyfzwBIQOjL/6dSEmZxQ5rJRezN7spps8E7iu+R6utS8c2ab0AgBNFfH"></script>
```

The full list of digests for every file can be found below.

Digests
